

## What is NFTbased?

NFTbased is a digital label that owns intellectual property of music and movies baked into NTFs and rents them to different streaming platforms. In exchange NFTbased receives royalty, which is distributed as profit to its owners.

## What is NFT?

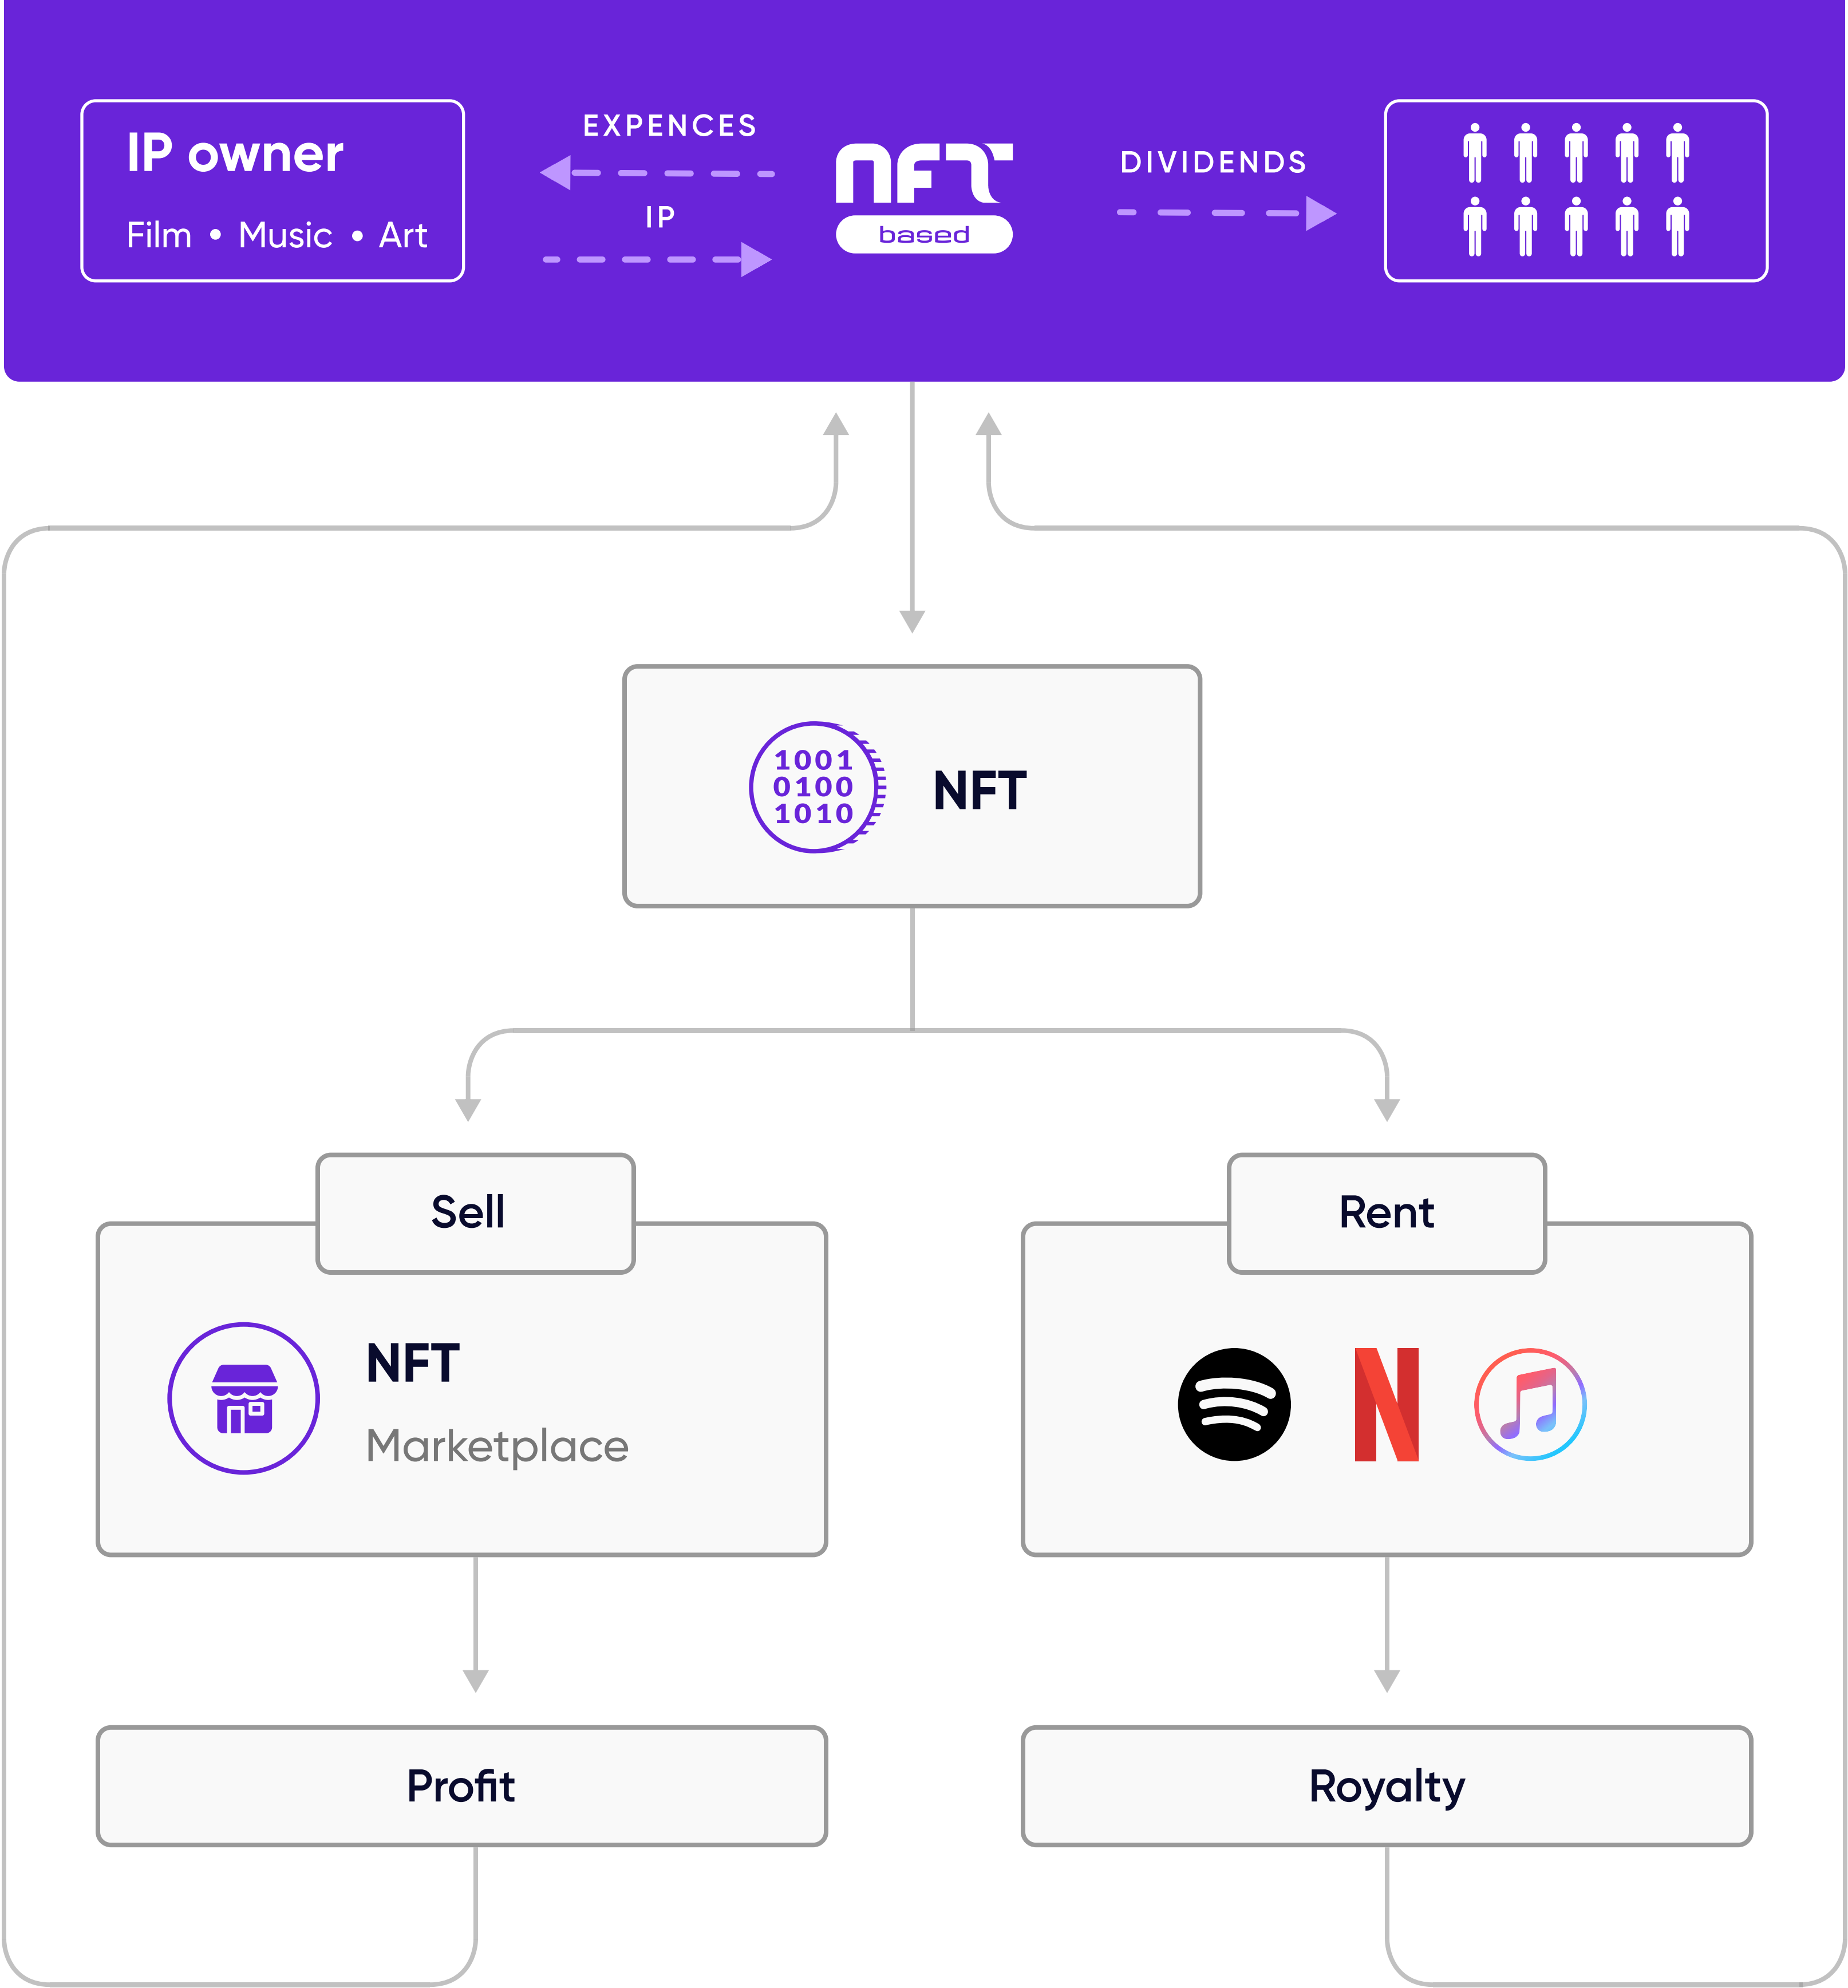

An NFT is a digital asset that represents real-world objects like art, music, in-game items and videos. They are bought and sold online, frequently with cryptocurrency, and they are generally encoded with the same underlying software as many cryptos.

## What is Royalty?

A sum paid to a patentee for the use of a patent or to an author or composer for each copy sold or for each stream performed.

## Who is building NFTbased?

It's developed and supported by a union of artists and blockchain developers of a total of 15 people.

## What is the NFTB token?

It is an ethereum-based token serving as a “digital share” of NFTbased label. Depending on the amount of tokens the dividends are distributed.

## Is NFTbases a competitor to Ethereum?

No, it uses Ethereum and creates an ecosystem as a separate level based on the Ethereum blockchain.

## What is Ethereum?

Ethereum is a digital platform which allows people to build a range of decentralised applications. These applications can include security programs, voting systems and methods of payment. Like bitcoin, ethereum operates outside the mandate of central authorities such as banks and governments.

## What is blockchain?

A blockchain is a distributed ledger. Blockchain technology enables the development of permissionless decentralized applications.
